

## **Margulies Perruzzi Architects Selected by Goodrich ISR Systems for Design of Division Headquarters**

**BOSTON, Mass. – October 25, 2010** – Margulies Perruzzi Architects, one of Boston's most innovative architectural and interior design firms, today announced that it has been selected by Goodrich ISR Systems to design 185,000 square feet of laboratory and office space for the business unit's new headquarters in Westford, Massachusetts. Goodrich ISR Systems is a division of Goodrich Corporation (NYSE: GR), a Fortune 500 company and a leading global supplier of systems and services to the aerospace and defense industry.

Margulies Perruzzi Architects is providing interior architecture and design services for Goodrich ISR's new space at 7 and 9 Tech Park in Westford. Previously headquartered in nearby Chelmsford, Massachusetts, Goodrich ISR's move to new headquarters will offer 120,000 square feet of office space as well as 65,000 square feet of state-of-the-art laboratory and assembly space for its growing business. Dedicated to serving intelligence, surveillance and reconnaissance (ISR) needs on space, air and ground platforms, Goodrich ISR Systems also supports industrial markets with specialty optics and cameras.

The design intent of the project is to create a sophisticated, scientific environment that streamlines the way Goodrich ISR conducts research and production. Toward that goal, Margulies Perruzzi Architects applied the LEAN process management philosophy to the design phase as part of the company's own continuous improvement process. The LEAN process management philosophy is a way of maximizing customer value while minimizing waste, using fewer resources, and gaining operational efficiencies.

"Quality and innovation are extremely important to Goodrich ISR, and the design of their headquarters needed to express these attributes," said Marc Margulies, AIA, LEED AP, principal at Margulies Perruzzi Architects. "The design team is excited to work on this challenging project to help Goodrich ISR create an environment that will enhance collaboration and support their strong mission of continuous improvement."

Meredith & Grew is providing project management services, and RDK Engineers is providing mechanical, electrical and plumbing engineering for the project. Goodrich ISR was represented by Colliers Meredith & Grew.

### ***About Margulies Perruzzi Architects***

Consistently ranked as one of Boston's top architectural and interior design firms, Margulies Perruzzi Architects creates buildings and corporate interiors for clients who value design. The firm services the corporate, professional services, healthcare, research/lab, and real estate communities with a focus on sustainable design.
