Margulies Perruzzi Architects completes design of new office

Published: 23-Sep-2011

Boston-based architectural and interior design company Margulies Perruzzi Architects has completed the design of a new office for global life sciences venture capital firm SV Life Sciences Advisers in Boston, Massachusetts.

The building covers an area of 8900 square feet. It accommodates workstations, a boardroom fitted with videoconferencing facilities, a central kitchen and social area. It also comprises offices which allow glimpses of the Custom House Tower and Boston Harbour.

Every door of the office is made from glass. The facility also features customised millwork in natural cherry wood which is contrasted by use of neutral tones. In addition, partial walls formed of glass have been installed in both the kitchen and the workstations to allow better penetration of natural light and to create an open feel.
