Best Doctors' New Boston Office Design Complete

The design of Best Doctors Inc.'s new 54,000-square-foot office at 100 Federal St. in Boston has been completed by Margulies Perruzzi Architects.

The offices feature light maple wood furniture and conference tables, with a number of traditional boardroom seating and modern casual chairs, according to a statement. Local artist Sarah Egan also painted a wall in the firm's reception area, creating a piece with tonal color and plaster paint.

Best Doctors, a clinical advocacy solutions firm, is now located on two floors at the Boston office building. It relocated its corporate headquarters from One Boston Place because the firm required larger space to accommodate the company's current and long-term growth.

Commodore Builders was the general contractor for the project, and RDK Engineers provided mechanical, electrical and plumbing engineering. Cushman & Wakefield was the tenant broker and project manager.
