Two LEED® Accredited for Margulies

Boston, MA - Margulies & Associates, an architectural and interior design firm of Boston announced that Associates Christine Law and Monica Moreira recently achieved

Law

recognition as Leadership in Energy and Environmental Design (LEED®) Accredited Professionals.

A member of the U.S. Green Building Council (USGBC), Margulies & Associates is currently working on two projects seeking LEED certification.

With over 11 years of experience, Law is responsible for design team coordination, contract documents, and project detail information including design, space planning and construction administration. She is currently working on two projects for Mass. General Hospital, including the

Moreira

relocation of emergency department offices and training space into two separate buildings.

With over 12 years of experience as a project architect, project manager and detail designer, Moreira

is currently project manager for the architectural design and interior fit-out of new 325,000 sf customer service center for Blue Cross Blue Shield of Massachusetts. She currently serves on the Board of Directors of the Boston Chapter of the International Facilities Management Association (IFMA).

"We are proud to add Christine and Monica to our growing team of LEED Accredited Professionals," said Janet Morra, AIA, LEED AP, principal of Margulies & Associates.
