

## **Margulies Perruzzi Architects Selected by Forrester Research for Design of New Corporate Headquarters**

*Forrester chooses design firm for interior architecture and design of LEED® Gold office space*

**BOSTON, Mass. – April 19, 2010** – Margulies Perruzzi Architects, one of Boston’s most innovative architectural and interior design firms, today announced that it has been selected by Forrester Research, Inc. (Nasdaq: FORR) to design 190,000 square feet of office space for the company’s new corporate headquarters at Cambridge Discovery Park in Cambridge, Massachusetts. The project is being designed to meet LEED® Gold certification.

An independent research company that provides pragmatic and forward-thinking advice to global leaders in business and technology, Forrester has outgrown its current home at 400 Technology Square in Cambridge and sought a space that could accommodate its flexible work style and growth needs. In 1999, Margulies Perruzzi Architects completed the interior architectural design of Forrester’s 125,000 square foot corporate headquarters at 400 Technology Square. Since then, Margulies Perruzzi Architects has worked with Forrester on the design of its offices in San Francisco and Foster City, California; Dallas, Texas; and Amsterdam.

Margulies Perruzzi Architects will provide interior architecture and design services for Forrester’s new space at Cambridge Discovery Park, a 27-acre master planned campus owned and developed by The Bulfinch Companies, Inc., a real estate investment and development firm. Forrester’s space will emphasize a connection to the green outdoor space that is being developed adjacent to the building. Currently in design under the leadership of Margulies Perruzzi Architects principal Janet Morra, AIA, LEED AP, Forrester’s new corporate headquarters is slated for completion in August 2011.

“We appreciate the energy, enthusiasm and creativity the Margulies Perruzzi Architects team brings to all of our projects,” said Jean Baranowski, vice president of corporate services at Forrester Research. “They really understand Forrester’s collaborative culture, flexible work style, and our preference for a sustainable space. This understanding allows them to design distinctive offices for our employees and clients. We look forward to working with the team on this exciting new space.”

"Having worked together for ten years on multiple projects, we are pleased to once again assist Forrester Research in creating a unique and flexible workplace to meet their needs as the company expands," said Marc Margulies, AIA, LEED AP, principal at Margulies Perruzzi Architects. "Sustainability is important to the employees and clients of both Forrester and Margulies Perruzzi Architects. The LEED Gold focus of this project was a significant opportunity and goal for both companies to pursue."

Leggat McCall Properties is providing project management services, and AHA Consulting Engineers is providing mechanical, electrical and plumbing engineering for the project. Forrester Research was represented by Richards Barry Joyce & Partners, LLC.
